

SIP Trunking

SIP Trunking enables advanced IP features to work across locations

- Calls from your office phone can ring on your desk phone, mobile phone, or simultaneously.
- All calls can be centrally handled for all locations.
- A single IP PBX can support users in multiple sites across the nation.

SIP Trunking reduces costs by getting rid of idle capacity

- SIP Trunking allows you to purchase fewer trunks at each location.
- Use idle capacity at one location to meet increased call activity at another location.
- Customers avoid wasting unused capacity at individual locations.

Advantage of SIP Trunking
