

CloudOffice

Virtual Desktop Bundle for SMBs

CloudOffice is a multi-tenant virtual desktop bundle solution that includes a Windows 10 desktop experience, company file share, user profile storage, Microsoft Office 2016, and many other common productivity applications for users. Additionally, RapidScale can package your business applications and add them to your CloudOffice environment.

Virtual Desktop

CloudOffice runs on our advanced virtual desktop platform, packaged with your business applications and controlled and monitored 24x7x365.

Scalability

Upgrade your RapidScale CloudOffice environment on the fly, with little to no impact on your end users.

Applications

Experience the environment complete with your business applications and some of the most common productivity applications.

Productivity

Your users can access CloudOffice from anywhere, on any device, at any time, while administration is centrally controlled.

Features

- Powered by Citrix's HDX protocol, which delivers a seamless desktop user experience, rich media content, and access to local USB devices
- Self-service provisioning of desktops and applications via a robust portal
- Standard Microsoft Office 2016 desktop and mobile applications

Secure

Lock down legacy PCs by forcing them to RapidScale's CloudOffice platform. Our team takes care of support, patching, backups, and virus protection.

Performance

RapidScale maintains the highest performance enterprise infrastructure available on the market today, complete with 10G Core Network, Cisco UCS Compute, NetApp All Flash Storage, and more.

Managed Environment

RapidScale offers a fully managed solution that eliminates the need for IT teams to worry about patches, upgrades, end-user device troubleshooting, application integrations and testing, and much more. RapidScale's CloudOffice makes it simple and convenient for businesses to manage their users and corporate data within a virtual environment.
