

INTRODUCING

FROM COMCAST BUSINESS

Get big-time features on a small business budget.

DEMAND FOR WIFI IS GROWING

WiFi has become as essential to business as the Internet itself. Your employees need access to cloud applications and shared devices like printers, while your guests and customers expect fast connections to stream videos and access social media networks. To stay ahead of the competition, your business is going to need more than just fast, reliable WiFi – you'll need an advanced solution that's smart, scalable and flexible. Enter WiFi Pro.

WIFI PRO OVERVIEW

Fastest WiFi Speeds

Get the fastest WiFi speeds and the most coverage for your employees and customers.

Promotional Tools

Customize your WiFi networks' names and splash pages – even share real-time offers. Plus, connect your customers to your social network pages directly through your WiFi.

Easy-to-Control Features

Allocate your networks' bandwidth, access reporting and customer analytics — all from your smart device.

Wireless Security

24/7 active security monitoring and content filtering to keep your network safe.

COMCAST BUSINESS WIFI PRO IS BUILT FOR BUSINESS

WIFI PRO FEATURES

Multiple Networks

Open WiFi access for your customers, vendors and guests – along with the private WiFi you need to run your business securely and more efficiently.

- Multiple Access Points Expand your wireless reach with up to two access points.
- Customized Splash and Landing Pages

Look like a big company in the eyes of your customers. Customized pages allow you to brand your WiFi as well as the ability to feature real-time offers.

Social Network Integration f y 3

Drive your customers to your social network pages and give them the option to like or follow your business.

Custom WiFi Network Name (SSID)

Why just offer complimentary WiFi when you can brand it? Your customers won't just connect – they'll connect to you.

WiFi Network Scheduling

Provide WiFi only when you want to, like during store hours. Plus, you can schedule your private and guest networks separately.

Bandwidth Allocation

Set your own limits on bandwidth to make sure the guest Wifi doesn't impact your private business network.

Content Filtering

Prevent your employees and guests from accessing inappropriate websites.

Advanced Customer Analytics

Use WiFi technology to identify customer trends. Tailor your business based on customer demographics, average customer shopping times, foot traffic and so much more.

Remote Configuration

Configure your wireless networks from anywhere (browser and smart device supported).

Plus, WiFi Pro is installed professionally and supported 24/7.

MORE CONTROL. MORE CUSTOMIZATION. MORE SECURITY.

We use WiFi to do more than ever. And the demand for WiFi is only growing. Below you'll find several key features that make setting up your private and guest WiFi networks easy and secure.

SPLASH PAGE

Reinforce your brand each time someone accesses your WiFi by customizing the landing page, promoting real-time offers, and integrating with your social network pages.

PRIVATE WIFI

Easily set up passwordprotected WiFi for your employees and create your own network name and security levels.

GUEST WIFI

A separate, secure network for customers and guests can be easily configured with your business name and other customizable features.

CONTENT FILTERING

Control access to specific content to restrict unwanted traffic like file transfers, illicit sites and malware.
