

Ethernet Services

Link multiple locations with nationwide reach. Leverage bandwidth-intensive applications. Fortify your business continuity plans. Do it all with customized Ethernet Services from Spectrum Enterprise.

Ethernet Services overview

Simplify your wide-area network (WAN) infrastructure for secure, seamless collaboration. Cost-effectively connect your locations with simple, flat-rate pricing. Empower your IT staff with network visibility via a secure Ethernet services portal providing real-time status updates and reporting capabilities.

Ensure network reliability by partnering with one of the largest Ethernet providers in the U.S. with more MEF CECP 2.0-certified professionals than any other provider. This means your evolving business can depend on Ethernet services from an industry leader with a robust, fiber-rich network and highly competitive service-level agreements.

MEF CE 2.0-certified topologies for any business

Point-to-point

Ethernet Private Line (EPL)

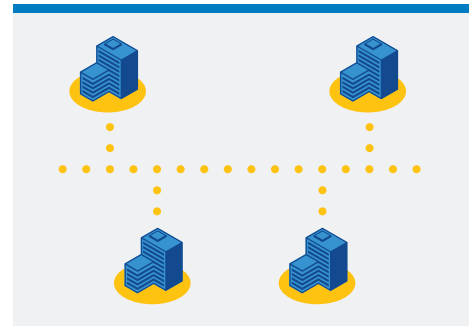

For businesses with two locations, EPL is a cost-effective, reliable, high-capacity business Ethernet solution. EPL connects client premises equipment (CPE) with a lower-cost User Network Interface (UNI), making it a smart alternative to traditional TDM private-line service.

Point-to-multipoint

Ethernet Virtual Private Line (EVPL)

EVPL offers a reliable, high-bandwidth and cost-effective alternative to legacy TDM private-line, frame-relay or ATM service. It enables companies with a central office and satellite locations to communicate and collaborate seamlessly on one robust, secure network.

Multipoint-to-multipoint

Ethernet Private LAN (EP-LAN)

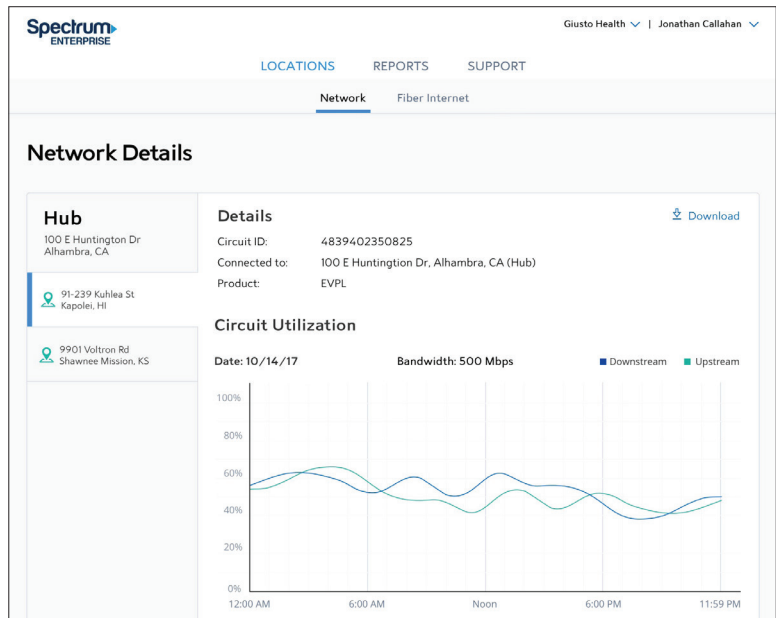

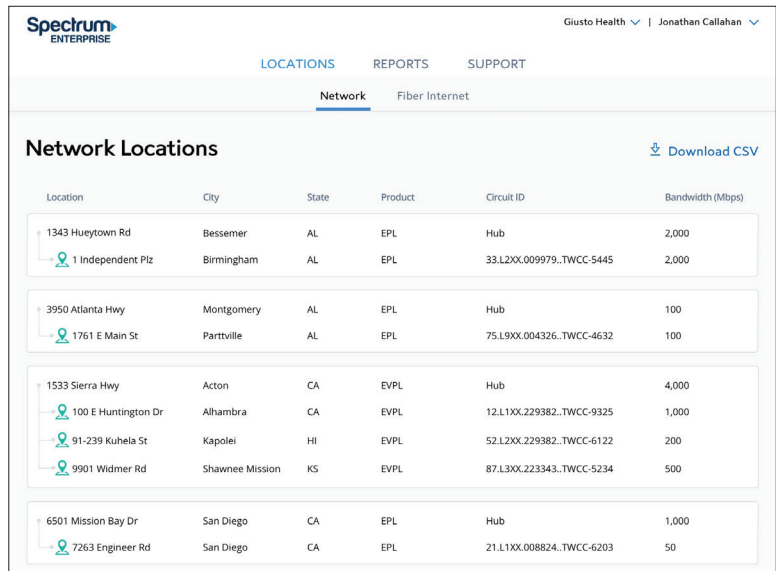

Combining the privacy of traditional ATM/frame-relay or private-line service with the performance and resiliency of IP VPN, EP-LAN is ideal for connecting multiple campuses. Now, widespread locations can share one seamless, secure network with the bandwidth to elevate productivity and efficiency to new levels.

SpectrumEnterprise.net

The Spectrum Enterprise client portal provides visibility to your Ethernet services anytime, anywhere and on any device. See your network inventory and circuit performance through interactive graphs and downloadable reports.
